PROPERTY DESCRIPTION

The moment we saw 110 Corbin Street, we knew it was meant to be our home. Nestled in a quiet, friendly neighborhood, the wide driveway felt perfect for our RV, basketball games, and welcoming family and friends. Inside, the open floor plan instantly drew us in, with hardwood laminate floors leading to a large living room where weâ€™ve hosted countless gatherings. We poured our hearts into upgrades: the kitchen now has granite countertops, all-new appliances, updated lighting, and even a custom moveable island Jason built. The master bath was a labor of love. Double sinks, dual mirrors, and a double walk-in shower make it our favorite retreat. Outside, we built a gazebo for shade and installed lighting around the front of the home that adds a magical touch year-round. The workshop with electricity has been a creative hub, and the HVAC systemâ€™s new components keep everything comfortable. This home has been a blessing for our family, and we hope it will be for you, too.
